Professional Summary

I am a final-year B.Tech Computer Science student with strong academic performance and hands-on experience in coding, full-stack development, AI/ML, and real-time applications. I am eager to leverage my technical expertise, internship exposure, and leadership experience to contribute to impactful software solutions while continuously growing as a professional.

Education

2022 – 2026 B.Tech in Computer Science, Sreenidhi Institute of Science & Technology	CGPA: 9.19/10.0
2020 – 2022 Board of Intermediate Education - BIE, Alphores Jr College, Karimnagar	Marks: 966/1000
2020 Telangana Board of Secondary Education (SSC), Paramita Heritage School, Karimnagar	CGPA: 10.0/10.0

Skills

Languages: C, Java, Python, SQL

Tools: VS Code, Git, MySQL

Web Technologies: HTML, CSS, JavaScript, MERN

Soft Skills: Communication, Team Work, Problem Solving, Attention to Detail, Leadership

Internship Experience

AI/ML Virtual Internship, Google for Developers Oct 2024 – Dec 2024 (Remote)
Virtual training program on core AI/ML concepts with practical projects and industry mentorship.

Google Generative AI Virtual Internship, Google Cloud Jul 2024 – Sep 2024 (Remote)
Focused on generative AI fundamentals with hands-on practice using Google Cloud tools.

Java Programming Virtual Internship, InternPe Mar 2024 – Mar 2024 (Remote)
Completed a Java internship at InternPe, gaining hands-on experience in core Java, OOPs concepts, and basic project development.

Projects

Automated Testing Using Machine Learning - Machine Learning [GitHub]
Created an automated testing system for e-commerce platforms based on machine learning to find high-risk areas, create test cases, and enhance bug detection. Improved test efficiency and coverage through the use of bug history and user behavior analysis.

Attendance Management System - Full Stack Web Development [GitHub]
Created a responsive user interface (UI) and real-time tracking for a MERN stack attendance system. Highlighted absentees and displayed weekly trends using Chart.js.

Home Loan Prediction using Logistic Regression [GitHub]
Implemented a machine learning model to predict loan approval statuses based on customer attributes using logistic regression. Covered data cleaning, feature selection, model training, evaluation, and visualization in Python.

Mood Based Music Recommender - Web Development [GitHub]
Mood-Based Music Recommender is a web-based project that plays music based on user-selected mood, with dynamic visuals and themed audio. Built using HTML, CSS, and JavaScript.

Organizations

IEEE SPS ChairPerson, SNIST 2024 – 2025
Served as IEEE SPS Student Chapter Chairperson, leading technical events, workshops, and student engagement initiatives.

Certifications

- Python Programming – Skill India Digital Hub (NSDC)
- ServiceNow Micro-Certification – Flow Designer
- SQL Developer
- IBM Python for Data Science (PY0101EN)
- TCS iON Career Edge – Young Professional
