

**PODDUTURI HARSHITH**

Course : **B.Tech**, Computer Science & Engineering, 2026

Email : 22311a0567@cse.sreenidhi.edu.in

Mobile : 9154673116

Social : [Hackerrank](#) [Github](#) [Codechef](#)

CGPA : 7.89

**ACADEMIC DETAILS**

| COURSE    | INSTITUTE/COLLEGE                   | BOARD/UNIVERSITY                                  | SCORE     | YEAR |
|-----------|-------------------------------------|---------------------------------------------------|-----------|------|
| CLASS XII | Narayana Jr college                 | Telangana Board of Intermediate Education (TSBIE) | 971 MARKS | 2022 |
| CLASS X   | ST.Marys Vidhyanikethan High School | Telangana Board of Secondary Education (SSC)      | 10 GRADE  | 2020 |

**PROJECTS**

**Operating Systems Project – Memory Paging Simulation - Operating system** Jun 2025 - Jul 2025

Simulated simple and demand paging in OS, implementing memory allocation, page-frame mapping, and free frame tracking.

**Full-stack Movie Ticketing System web application - Web Technologies** Jun 2025 - Jul 2025

Built a full-stack Movie Ticketing System using HTML, CSS, JavaScript, PHP, and MySQL, enabling users to book tickets online with secure payments, seat selection, and admin management — improving efficiency and user experience.

**Google Map Generator - development** Feb 2025 - Mar 2025

Google Maps API to create static map visualizations. Skilled in building responsive, user-friendly interfaces using HTML and CSS. Strong understanding of geolocation features, API parameters, and custom map styling. Passionate about delivering clean, maintainable code and enhancing user experience through interactive web components.

**QR code generator - development** Dec 2024 - Jan 2025

This web development portfolio showcases interactive applications, including a QR code generator (HTML/CSS/JS) and a Google Maps API-powered map tool (Python). It demonstrates strong skills in front-end development, API integration, and user-centric design.

**pizza sales project - SQL** Jul 2024 - Jul 2024

This SQL project analyzed pizza sales data to derive actionable business insights into order patterns, revenue generation, and product preferences. It showcased the ability to use SQL for data retrieval, manipulation, and analysis, ultimately informing sales, marketing, and operational decisions.

**Tic Tac Toe Game - Python** Mar 2024 - Apr 2024

Developed a Python-based console Tic Tac Toe game demonstrating proficiency in loops, conditionals, and list manipulation, while applying problem solving and algorithmic thinking to implement game logic and win/draw detection

**CONFERENCES AND WORKSHOPS**

**BeingZero Placement Training**

Organized by: **BeingZero** | Date: **Jul 2024**

Completed a structured placement training program focused on problem-solving, data structures, algorithms, and interview preparation.

**CERTIFICATIONS**

| CERTIFICATION                | CERTIFYING AUTHORITY     |
|------------------------------|--------------------------|
| Introduction to Data Science | Cisco Networking Academy |
| Python Essentials            | Cisco Networking Academy |

|                                        |                          |
|----------------------------------------|--------------------------|
| CSS (Basic)                            | HackerRank               |
| Data Science Master Virtual Internship | Altair                   |
| AI-ML Virtual Internship               | Google for developers    |
| Cloud Virtual Internship               | AWS Academy              |
| AI Fundamentals with IBM SkillsBuild   | Cisco Networking Academy |
| Data Analytics Essentials              | Cisco Networking Academy |

|                       |                                                                                                                                                                                                                                                                                                                                                                                                                                             |
|-----------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Subjects / Electives  | Software engineering , Python Programming, Data Warehouse and Data Mining, Basics of Entreprenurship, Artificial intelligence and Deep Learning, Object Oriented Principles through Java, Operating system , Introduction to data Science, Discrete Mathematics, Computer networking, Big Data Analytics, Web Technologies, Database management system, Probability and statistics , Machine Learning, Entrepreneurship and Business Design |
| Technical Proficiency | Python, Power BI, HTML + CSS, Github, AWS, SQL, C Programming, Artificial Intelligence, Machine Learning, JavaScript, Java, Microsoft Office, Operating Systems, Soft Skills                                                                                                                                                                                                                                                                |
